

1. In the browser, visit : <http://localhost:8080/api>

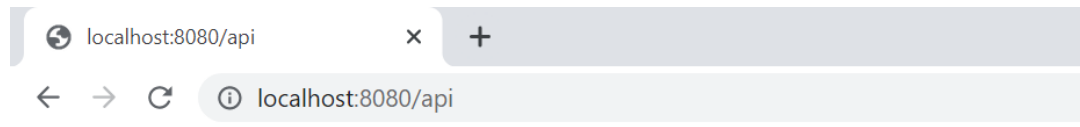

A screenshot of a web browser window. The address bar shows 'localhost:8080/api'. The page title is 'URL Shortner'. Below the title, there is a form with the label 'Enter the URL:' followed by a text input field and a 'Submit' button.

2. Provide the url you want to shorten and click on Submit

A screenshot of the same web browser window. The address bar now shows 'localhost:8080/api' and the page title is 'URL Shortner'. The text input field in the form now contains the URL 'j.junit.jupiter/junit-jupiter-api'. The 'Submit' button is still present.

You will receive the original as well as the shortened url

Original Url : <https://mvnrepository.com/artifact/org.junit.jupiter/junit-jupiter-api>

Shorten Ur : <https://sho.rt/9AUyf>

Test the Url

Enter the URL:

3. Copy the Shorten url to test and Click on test

Test the Url

Enter the URL:

You will be taken to the original website

Home » org.junit.jupiter » junit-jupiter-api

JUnit Jupiter API

Module "junit-jupiter-api" of JUnit 5.
